

SAFETY AT THE HIGHEST LEVEL

GUARDRAIL KIT FOR LADDER ACCESS POINTS

- PERMANENTLY FIXED GUARDRAIL EITHER SIDE OF AN EXISTING FIXED LADDER WITH A SELF-CLOSING SWING GATE
- CAN BE "RETRO-FITTED" TO EXISTING FIXED LADDERS/CAT LADDERS
- EASILY CLAMPS TO MOST TYPES OF LADDERS
- CONFORMS TO EN 14122-4

KeeGuard® Ladder Kit

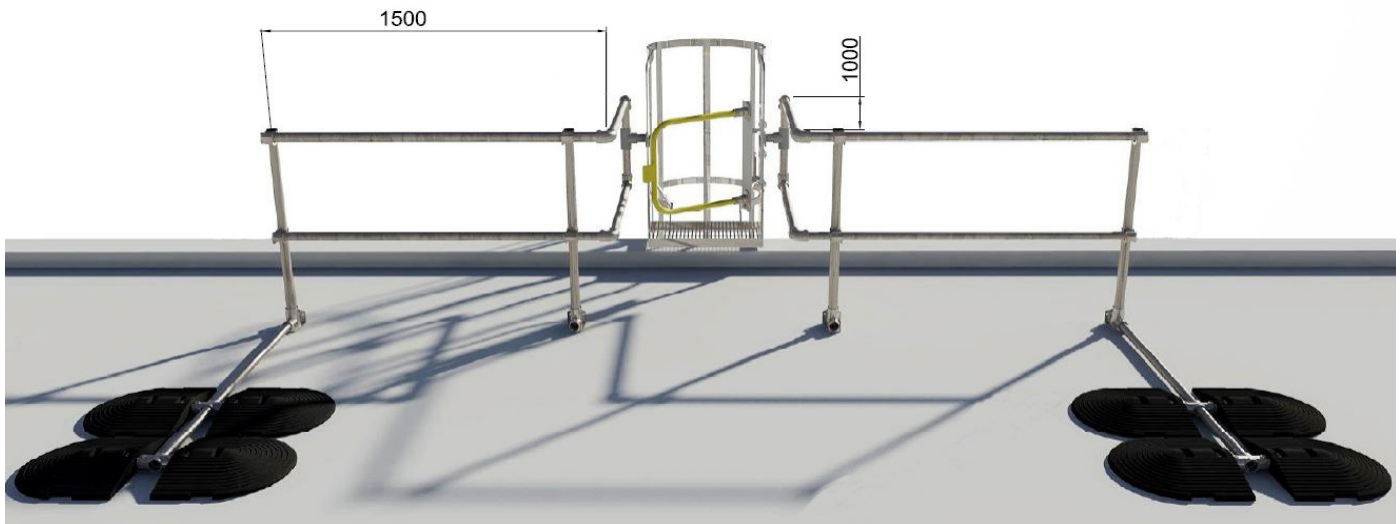

KeeGuard® Ladder Kit provides permanently fixed guardrail either side of an existing fixed ladder and a self-closing swing gate permitting safe roof access for the purpose of inspection or maintenance work on roofs.

The kit has been specifically designed to provide a “retro-fit” solution to existing fixed ladders/cat ladders to ensure the complete assembly complies with EN 14122-4.

KeeGuard® Ladder Kit has been developed to easily clamp on to the existing fixed/cat ladder and forms a continual link from the guardrail to the stringer of the ladder. The unique fitting connecting the guardrail to the fixed/cat ladder can clamp around a flat or tubular stringer up to 75mm in width/diameter.

The kit's design provides permanent edge protection without the need to mechanically fix the system through the roofing membrane or building's structure.

Features & Benefits

- Guardrail to enhance safety around ladder access points
- Prevents falls down the side of the ladder
- Complies with EN 14122 Part 4
- Counter balanced system so no damage to the roof membrane or building structure
- Can be “retro-fitted” to existing fixed/cat ladder
- Free-standing roof guardrail at 1.5m either side of the ladder
- Reversible self-closing gate
- Available as a kit
- Galvanised steel finish
- Simple and quick to install
